Research Log

Name: _____

What is your topic or research goal? (if helpful, express it in the form of a question)				
Make a list of possible search terms here. Collect good search terms from every source you use. Identify synonyms and related terms that might be helpful. In the catalog, think about searching terms that are broader than your topic to locate a book with a chapter on your topic.				
Date	**Information source—** name it to avoid repetition—which online catalog?, which database, reference book, or Internet site?	**What was your search strategy?** Record the exact search you tried to avoid repetition. Did you field search or keyword search? Did you search by subject? Did you use a keyword search and Boolean logic? (Boolean logic is combining concepts using <and> to narrow; <or> to broaden)	**Search results** total # of hits # of relevant or useful results	**Evaluation of search results** value of information found, problems with the search strategy or results, what to do next etc. **What new search terms did you identify?**
